Raji – early on in the discussions of the RI/FS, we talked about using EPA’s database Scribe. Since we are about to start collecting data, I wanted to see if that was still the case. Please advise.

By the way, there is a lot of rain in the forecast for Houston for the next week and a half, and into the week of the 2nd of May. Our drillers are scheduled and we are planning on starting the drilling on the 2nd. We will work if it is safe to do so. Regardless, it will very likely be wet and messy out there. We can catch up on the schedule and outlook for the May 2nd week at the Community Meeting on the 28th.

Thanks

Matt
